

Automatically grow your savings with

# RoundUp

Grow your savings with every debit card purchase! Automatically transfer money from your checking to savings account with RoundUp.

## How RoundUp Works:

We'll round up each of your Mastercard® debit card transactions to the nearest dollar and transfer the difference from your checking account to your designated savings account after every business day.

For example, if you buy coffee for \$1.53, we'll RoundUp to \$2.00 and transfer \$0.47 to your designated savings account.

## More Options for Saving:

Enjoy more options for saving with each transaction! Choose the option that works best for you:

- Round up debit card transactions to the nearest whole dollar.
- Set \$1, \$2, or \$5 to transfer into savings per debit card transaction.

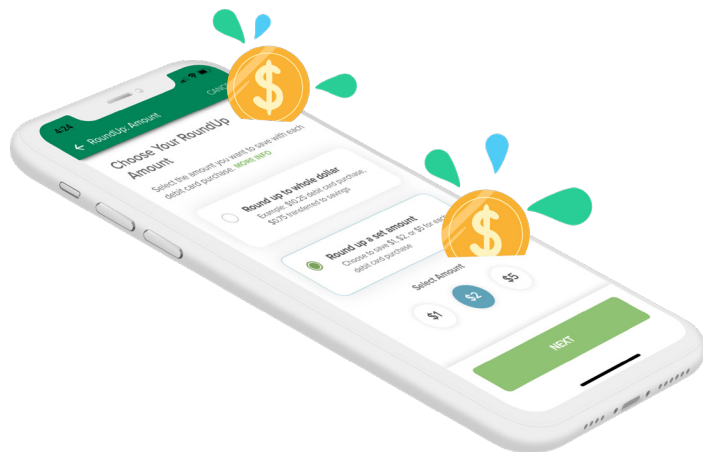

## Can't decide what to choose?

No worries! It's easy to change your saving preferences anytime by logging into your Online Banking or Mobile Banking App.

## Don't have an account?

It's quick and easy to get started! You'll just need a Central Bank checking account and savings account. As always, contact us if you have any questions or if there's any way we can assist you.
